

Health IT Solutions

Strategic Health IT Solutions

Deliver complex health IT initiatives faster and with less risk. e4health provides tailored solutions based on your organization's needs to achieve departmental goals and health system success. Incorporate strategic program governance and tactical operations expertise with proven lean approaches to drive change for clinical and financial results.

Measurable, Value-Driven Results

e4health delivers successful outcomes with increased speed and efficiency, reduced risk, and lower costs across healthcare organizations, while protecting and improving health system KPIs.

Depth of Domain Knowledge

e4health offers enterprise-wide expertise from program strategy and governance through technology deployment, data analytics, testing, and go-live support.

Mid-Revenue Cycle Breadth

e4health offers solutions throughout the entire HIT and HIM ecosystem, ensuring collaboration and success across multiple departments, systems, and teams.

Proven Integrity & Commitment

With more than 400 enterprise projects under our belt, e4health is a trusted advisor with a proven track record of enabling success and driving long-term customer loyalty.

- ➔ Go-Live Support

Health IT Solutions

From new systems and EHRs to extending existing teams, clients depend on e4health to engineer success. We deliver the highest levels of healthcare technology and revenue cycle expertise alongside a relentless commitment to integrity and data accuracy. Our teams ensure consistent quality and productivity to reduce risks and costs, deliver ROI, and inspire enterprise-wide confidence in a successful outcome.

→ Enterprise Program Management & Governance

Lean software and proven methods to drive EHR projects efficiently to provide a transparent, timely and accountable path forward.

→ Legacy Data Migration & Validation

Ensure patient data is transferred securely, completely, and accurately to improve clinician trust and satisfaction.

→ IT & Project Team Staffing

Identify short-term gaps and accomplish long-term goals with our deep bench of seasoned, staffed experts.

→ Clinical Informatics Solutions

Expertise to optimize workflows, enhance adoption, and improve patient outcomes.

→ Legacy System Support

Realize the substantial cost and time saving benefits of a leveraged managed application support service model.

→ Data Analytics

Improve operational proficiency and increase productivity with customized analytics solutions.

→ Testing Management & Coordination

Conquer successful system implementations with upgrades, meaningful use attestation, initiative readiness and more.

→ Go-Live Support

Be ready for any go-live curve balls with our Lean engineered, proven template for executing successful go-lives.
